

# Table of Contents

<b>Chapter 1 Electrical Theory .....</b>	<b>1</b>
<b>Unit 1 Electrician's Math and Basic Electrical Formulas.....</b>	<b>3</b>
Part A – Electrician's Math .....	3
1-1 Fractions .....	3
1-2 Kilo.....	3
1-3 Knowing Your Answer .....	3
1-4 Multiplier.....	3
1-5 Parentheses.....	4
1-6 Percentages.....	4
1-7 Percent Increase.....	4
1-8 Percentage Reciprocals.....	5
1-9 Rounding .....	5
1-10 Squaring .....	5
1-11 Square Root .....	6
Part B – Basic Electrical Formulas.....	6
1-12 Electrical Circuit .....	6
1-14 Power Source .....	6
1-15 Conductance and Resistance .....	7
1-16 Electrical Circuit Values .....	8
1-17 Ohm's Law $I = E/R$ .....	8
1-18 Pie Circle Formula .....	9
1-19 Formula Wheel.....	9
1-20 Power Changes with the Square of the Voltage .....	11
<b>Unit 2 Electrical Circuits.....</b>	<b>12</b>
Part A – Series Circuits.....	12
Introduction to Series Circuits.....	12
2-1 Understanding Series Calculations .....	12
Part B – Parallel Circuits .....	13
Introduction to Parallel Circuits.....	13
2-3 Practical Uses of Parallel Circuits .....	13
2-4 Understanding Parallel Calculations .....	14
2-5 Parallel Circuit Resistance Calculations.....	15
2-6 Parallel Circuit Summary.....	16
Part C – Series-Parallel and Multiwire Branch Circuits .....	16
Introduction to Series-Parallel Circuits .....	16

2-7	Review of Series and Parallel Circuits .....	16
2-8	Series-Parallel Circuit Resistance Calculations .....	17
Part D – Multiwire Branch Circuits .....		18
Introduction to Multiwire Branch Circuits .....		18
2-9	Neutral Current Calculations .....	18
2-10	Dangers of Multiwire Branch Circuit .....	19
<b>Unit 3 Understanding Alternating Current .....</b>		<b>22</b>
Part A – Alternating-Current Fundamentals .....		22
3-1	Current Flow .....	22
3-2	Alternating Current .....	22
3-3	Alternating-Current Generator .....	23
3-4	Waveform .....	23
3-5	Armature Turning Frequency .....	24
3-6	Phase – In and Out .....	24
3-7	Phase Differences in Degrees .....	24
3-8	Values of Alternating Current .....	25
Part B – Induction .....		25
Induction Introduction .....		25
3-9	Induced Voltage and Applied Current .....	26
3-10	Conductor Impedance .....	28
3-11	Induction and Conductor Shape .....	29
3-12	Induction and Magnetic Cores .....	29
Part C – Capacitance .....		31
Capacitance Introduction .....		31
3-13	Charge, Testing and Discharging .....	31
Part D – Power Factor and Efficiency .....		33
Power Factor Introduction .....		33
3-15	Apparent Power (Volt-Ampere) .....	33
3-16	Power Factor .....	34
3-17	True Power (Watts) .....	35
3-18	Efficiency .....	38
<b>Unit 4 Motors and Transformers .....</b>		<b>42</b>
Part A – Motors .....		42
Motor Introduction .....		42
4-1	Motor Speed Control .....	43
4-2	Reversing a Direct-Current Motor .....	43
4-3	Alternating-Current Motors .....	43
4-4	Reversing Alternating-Current Motors .....	44
4-5	Motor Volt-Ampere Calculations .....	44
4-6	Motor Horsepower/Watts .....	46
4-7	Motor Nameplate Ampere .....	48
Part B – Transformer Basics .....		50
Transformer Introduction .....		50
4-8	Transformer Primary and Secondary .....	51

4-9	Transformer Secondary and Primary Voltage .....	51
4-10	Autotransformers.....	52
4-11	Transformer Power Losses.....	52
4-12	Transformer Turns Ratio.....	53
4-13	Transformer kVA Rating.....	53
4-14	Transformer Current .....	53
<b>Chapter 2 National Electrical Code Calculations.....</b>		<b>57</b>
<b>Unit 5 Raceway, Outlet Box and Junction Box Calculations .....</b>		<b>58</b>
5-1	Understanding the NEC, Chapter 9.....	58
5-2	Raceway and Nipple Calculations.....	61
5-3	Existing Raceway Calculations.....	64
5-4	Tips For Raceway Calculations .....	65
Part B – Outlet Box Fill Calculations .....		65
Introduction [314.16].....		65
5-5	Sizing Box – Conductors all the Same Size [Table 314.16(A)].....	66
5-6	Conductor Equivalents [314.16(B)].....	66
5-7	Sizing Box – Different Size Conductors [314.16(B)] .....	67
Part C – Pull, Junction Boxes, and Conduit Bodies.....		69
Introduction.....		69
5-8	Pull and Junction Box Size Calculations .....	69
5-9	Depth of Box and Conduit Body Sizing [314.28(A)(2), Ex.].....	70
5-10	Junction and Pull Box Sizing Tips .....	71
<b>Unit 6 Conductor Sizing and Protection Calculations.....</b>		<b>72</b>
6-1	Conductor Insulation Property [Table 310.13].....	72
6-2	Conductor Allowable Ampacity [310.15] .....	72
6-3	Conductor Sizing [110.6].....	73
6-4	Terminal Ratings [110.14(C)].....	74
6-5	Conductors In Parallel [310.4].....	74
6-6	Conductor Size – Voltage Drop [210.19(A) FPN 4 AWG and 215.2(A)(4) FPN 2].....	75
6-7	Overcurrent Protection [Article 240] .....	75
6-8	Overcurrent Protection of Conductors – General Requirements [240.4] .....	76
6-9	Overcurrent Protection of Conductors – Specific Requirements.....	77
6-10	Equipment Conductors Size and Protection Examples.....	78
Part B – Conductor Ampacity Calculations .....		81
6-11	Conductor Ampacity [310.10].....	81
6-12	Ambient Temperature Ampacity Adjustment Factor [Table 310.16] .....	81
6-13	Conductor Bundling Ampacity Adjustment Factor [Table 310.15(B)].....	82
6-14	Ambient Temperature and Conductor Bundling Adjustment Factors .....	83
6-15	Current-Carrying Conductors .....	84
6-16	Conductor Sizing Summary.....	85

<b>Unit 7 Motor Calculations.....</b>	<b>86</b>
Introduction.....	86
7-1 Motor Branch-Circuit Conductors [430.22(A)].....	86
7-2 Motor Overcurrent Protection.....	86
7-3 Overload Protection [430.32(A)].....	87
7-4 Branch-Circuit Short-Circuit Ground-Fault Protection [430.52(C)(1)] ..	88
7-5 Feeder Conductor Size [430.24].....	89
7-6 Feeder Protection [430.62(A)].....	90
7-7 Highest-Rated Motor [430.17].....	91
7-8 Motor Calculations Steps.....	91
7-9 Motor Calculation Review.....	92
7-10 Motor VA Calculations.....	94
<b>Unit 8 Voltage Drop Calculations.....</b>	<b>97</b>
Part A – Conductor Resistance Calculations.....	97
8-1 Conductor Resistance.....	97
8-2 Conductor Resistance – Direct-Current Circuits, [Chap. 9, Table 8] ...	99
8-3 Conductor Impedance – Alternating-Current Circuits.....	99
8-4 Alternating-Current Impedance as Compared to Direct-Current Resistance.....	99
8-5 Impedance [Chapter 9, Table 9 of the NEC].....	100
Part B – Voltage-Drop Calculations.....	100
8-6 Voltage-Drop Considerations.....	100
8-7 NEC Voltage-Drop Recommendations.....	101
8-8 Determining Circuit Conductors Voltage Drop.....	101
8-9 Sizing Conductors to Prevent Excessive Voltage Drop.....	105
8-10 Limiting Conductor Length to Limit Voltage Drop.....	108
8-11 Limiting Current to Limit Voltage Drop.....	109
8-12 Extending Circuits.....	109
<b>Unit 9 Single Family Dwelling Unit Load Calculations.....</b>	<b>112</b>
Part A - General Requirements.....	112
9-1 General Requirements.....	112
9-2 Voltages [220.2(A)].....	112
9-3 Fraction of an Ampere [220.2(B)].....	112
9-4 Appliance (Small) Circuits [210.11(C)(1)].....	112
9-5 Cooking Equipment – Branch Circuit [Table 220.19, Note 4].....	113
9-6 Laundry Receptacle(s) Circuit [210.11(C)(2)].....	119
9-7 Lighting and Receptacles.....	119
Part B - Standard Method – Feeder/Service Load Calculations.....	120
9-8 Dwelling Unit Feeder/Service Load Calculations (Part II of Article 220).....	120
9-12 Neutral Calculations – General [220.22].....	122

<b>Chapter 3 Advanced NEC Calculations .....</b>	<b>123</b>
<b>Unit 10 Multifamily Dwelling Units .....</b>	<b>124</b>
10-1 Multifamily Dwelling Unit Calculations – Standard Method .....	124
10-4 Multifamily Dwelling Unit Calculations [220.32] – Optional Method .....	125
10-5 Multifamily – Optional Method Example [220.32] .....	128
<b>Unit 11 Commercial Load Calculations .....</b>	<b>129</b>
Part A – General .....	129
11-2 Conductor Ampacity [Article 100] .....	129
11-3 Conductor Overcurrent Protection [240.4] .....	129
11-4 Voltages [220.2(A)] .....	130
11-5 Rounding an Ampere [220.2(B)] .....	130
Part B – Loads .....	130
11-6 Air-Conditioning .....	130
11-7 Dryers .....	131
11-8 Electric Heat .....	131
11-9 Kitchen Equipment .....	131
11-11 Lighting – Demand Factors [Table 220.3(A) and 220.11] .....	133
11-12 Lighting Without Demand Factors [Table 220.3(A), 215.2(A)(1) and 230.42] .....	134
11-13 Lighting – Miscellaneous .....	134
11-14 Multioutlet Receptacle Assembly [220.3(B)(8)] .....	134
11-15 Receptacles VA Load [220.13] .....	135
11-16 Banks and Offices – General Lighting and Receptacles .....	135
11-17 Signs [220.3(B)(6) and 600.5] .....	136
11-18 Neutral Calculations [220.22] .....	136
Part C – Load Calculation Examples .....	137
Marina [555.12] .....	137
Mobile/Manufactured Home Park [550.31] .....	137
Recreational Vehicle Park [551.73] .....	138
Restaurant – Optional Method [220.36] .....	138
School – Optional Method [220.34] .....	140
<b>Unit 12 Delta/Delta and Delta/Wye Transformer Calculations .....</b>	<b>143</b>
12-1 Current Flow .....	152
Part A – Delta/Delta Transformers .....	152
12-2 Delta Transformer Voltage .....	152
12-3 Delta High-Leg .....	152
12-4 Delta Line Currents .....	153
12-5 Delta Phase Currents .....	153
12-6 Delta Phase versus Line Current .....	153
12-7 Delta Current Triangle .....	153
12-8 Delta Transformer Balancing .....	154
12-9 Delta Transformer Sizing .....	155
12-10 Delta Panel Balancing .....	155
12-11 Delta Panelboard and Conductor Sizing .....	155

---

12-12 Delta Neutral Current.....	155
12-13 Delta Maximum Unbalanced Load .....	156
Part B – Delta/Wye Transformers .....	156
12-15 Wye Transformer Voltage.....	156
12-16 Wye Voltage Triangle .....	156
12-17 Wye Transformers Current.....	157
12-18 Wye Line Current .....	157
12-19 Wye Phase Current .....	158
12-20 Wye Phase Versus Line Current .....	158
12-21 Wye Transformer Balancing .....	158
12-22 Wye Transformer Sizing.....	159
12-23 Wye Panel Balancing.....	159
12-24 Wye Panelboard and Conductor Sizing .....	159
12-25 Wye Neutral Current.....	160
12-26 Wye Maximum Unbalanced Load.....	160
12-27 Delta/Wye Example.....	160
12-28 Delta Versus Wye.....	160
<i>Index</i> .....	<i>162</i>
